

Christopher B. Burke Engineering, Ltd. (CBBEL) is a full-service consulting engineering and surveying firm committed to delivering accurate, timely and cost-effective solutions to a wide range of engineering and environmental challenges.

Intern with CBBEL!

Mentoring Program

One-on-one mentorship with CBBEL engineers allows mentees to learn skills that can be applied throughout their careers, while building their professional network and obtaining a greater knowledge of career success factors.

Software Training

With the rapid pace of technological change in the construction and engineering industries, software training is more important than ever. CBBEL interns get trained on the latest software, including Microstation, Geopak Road, Projectwise, Autoturn, Hydroflow, HY-8, Paydirt and Eaglepoint.

Site Visits

Our interns get hands-on experience with CBBEL projects, visiting project sites to explore how different disciplines come together to deliver a comprehensive solution. These site visits get our interns out of the office and into the field to demonstrate how classroom lessons are applied to real world engineering projects.

100 *licensed professionals*

total staff **240**

38 *years in business*

CBBEL's Internship Program provides students an opportunity to explore their career interests, expand their professional network and bridge the gap between the academic world and the working world.

The Program is designed to give interns the opportunity to apply academic knowledge in a professional environment as well as acquire new skills through continuous on-the-job training from CBBEL engineers.

Interns also have the opportunity to participate in CBBEL's award-winning chapter of Toastmasters International, helping to hone their presentation and public-speaking skills.
